- Breakpoints

```
# add breakpoint by the line number
pry> break /path/to/project/app/models/user.rb:22
# or by class and method name
pry> break User#admin?

# disable all breakpoints
pry> break --disable-all
# disable by number
pry> break -d 1
# enable by number
pry> break -e 1

# breakpoint with condition
pry> break User#my_method --condition 4 id == 2 # breaks
only if id equals 2
```

Capybara helpers

- Save page as html

```
# Change output dir
Capybara.save_and_open_page_path = "./tmp/capybara"

# Add to your code to save current page state
save_page
# or save and open saved page in your browser
save_and_open_page
```

How to open saved page when using VM.

- Save page as image

```
save_screenshot('path/to/my.png')
```

- Pause test server and login to test session

```
# Setup Capybara server (somewhere in acceptance_helper)
Capybara.server_port = 3000 # or everything you want)
```
