```
[1, 10] in /Users/bparanj/.rvm/gems/ruby-2.3.0@rails5/gems/
actionpack-5.0.0.beta3/lib/action_controller/metal/
basic_implicit_render.rb
    1: module ActionController
    2:   module BasicImplicitRender
    3:     def send_action(method, *args)
=>  4:       super.tap { default_render unless performed? }
    5:     end
    6:
    7:     def default_render(*args)
    8:       head :no_content
    9:     end
   10:   end
```

In this case, we step into the Rails source code.

Step 8

The eval command is one way to print the values of variables.

```
(byebug) eval performed?
false
```

Step 9

The continue command runs until program ends, hits a breakpoint or reaches a line.

```
(byebug) continue
  Rendered collection of tasks/_task.html.erb [19 times]
(0.6ms)
  Rendered tasks/index.html.erb within layouts/application
(2.3ms)
Completed 200 OK in 1860538ms (Views: 48.7ms | ActiveRecord:
2.5ms)
```

The tasks index action completes the execution and you see the list of tasks in the browser.

Step 10

Move the byebug before retrieving all the tasks.

```
def index
```
