Carbohydrate

A high carbohydrate diet is recommended to supply enough calories and spare protein for tissue regeneration. High carbohydrate foods like sugar, jaggery and fruit juices can be given. A requirement of 300-400 grams per day can be given for the patient.

Vitamins and Minerals

The requirement of Vitamin B, C and K are increased. It should be met through supplementation or through diet. The diet should be provided with minerals such as calcium and iron in adequate amounts. Serum sodium and potassium levels are monitored and electrolyte balance should be maintained.

Foods to be included and avoided for Hepatitis

Foods to be included	Foods to be avoided
Sugar, honey, Glucose	Fried and fatty foods.
Cereals, Pulses	Fats, Oils
Milk and milk products, Eggs	Nuts and Oilseeds
Fruits and vegetables	Strongly flavoured vegetables

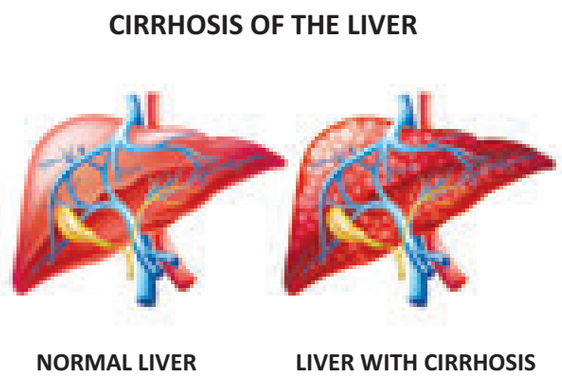

Fig 8.5 : Cirrhosis of the Liver

HOME REMEDIES
FOR JAUNDICE

- Sunlight is used in the treatment of neonatal jaundice.
- Prepare juice of the green leaves of radish and mix some sugar. Filtrate can be taken 2 times a day for a week.
- Mix one teaspoon of aloe vera pulp with black salt and dry ginger powder. This is taken for 10 days every morning.
- Take clean leaves of keezhanelli (without stem) and the seeds below the leaves (very small). Put it in the blender with some water to make an extract. Add buttermilk to the keezhanelli extract. Add crushed black pepper on it. Drink it everyday

8.2.2 CIRRHOSIS

Liver cirrhosis is a degenerative disease characterized by inflamed liver cells, abnormal fibrosis and development of nodules leading to obstruction and liver failure.

The etiology of liver cirrhosis is:

- Neglected acute or chronic hepatitis
- Alcoholism associated with malnutrition
- Viral infection
- Toxins
- Metabolic disorders
- Biliary obstruction
- Altered immune system

The symptoms of liver cirrhosis include:

- GI disturbances (anorexia, nausea, vomiting and abdominal pain)
- Electrolyte and fluid imbalance
- Ascites (accumulation of water in abdominal cavity)
