Evaluvation

I. Choose the correct answer

1. Tachycardia is due to excess amount of ----- in the blood.

   (a) sodium (b) Potassium

   (c) protein (d) Fat.

2. For nephritis, daily fluid replacement should be --------- ml plus daily amount excreted in urine.

   (a) 200 (b) 300

   (c) 300 (d) 40

3. ------- is rich in uric acid.

   (a) Meat extracts (b) Tea

   (c) Tomato (d) Milk.

4. ---------- is released from the kidneys in response to low BP.

   (a) Renin (b) Calcitonin

   (c) Insulin (d) Gastrin.

5. This food is rich in oxalate.

   (a) Milk (b) Kidney

   (c) Liver (d) Fish.

II. Short answers

1. What is meant by leeching?
2. What are the causes of glomerulonephritis?
3. Differentiate between oliguria and anuria.
4. What is renal colic?
5. List the foods rich in potassium.
6. What is Lithotripsy?

NESJN6

III. Brief answers

1. What are the foods restricted in sodium rich diets?
2. Write on the causes of kidney stones.
3. How can stone formation be prevented?
4. Write on oxalate stones and calcium stones.
5. How are kidney stones treated?

IV. Detailed answers

1. Explain the functions of kidneys.
2. Write on the types of kidney diseases.
3. Write on the symptoms of nephritis.
4. Discuss the dietary management of glomerulonephritis.
5. Explain the dietary management for kidney stones.
6. Discuss the home remedies for kidney stones.
