1 day menu for an adult (sedentary work)

- Energy – 2875 kcal
- Protein – 60 gm (60kg wt.)

Meal	Food	Quantity
Early Morning	Milk or tea with sugar	1 cup
Breakfast	Bread with egg or paratha with curd, coffee	1 egg, 2 bread, 2 paratha, 1
Mid-day	Fruit chat or fruit juice or Tea with biscuits	1 cup, 4-6
Lunch	Vegetables, Chapati, Rice, Curd, Salad	1 cup, 2, 1 plate, 1 cup mixed
Evening Tea	Tea with snacks	1 cup
Night Dinner	Dal/ rajama, Vegetables, Chapati	1 cup 1 cup , 3
Bed time	Kheer/fruit	1 cup/fruit

1.5 Food Exchange

Each food group has similar food items that have been placed together in one food group. Therefore, if we substitute one food for the other in the same group, we will be able to get almost the same nutrients. For example, 'X' takes one glass of milk and roti in breakfast, 'Y' eats poha (rice flakes)and one Katori of curd whereas 'Z' eats one fresh cheese (paneer) sandwich. Looking at their food selection, all of them take milk or its product along with cereals and get approximately the same nutrients. So we can say that substitution of one food item with the other within a group in such a way that the nutrients provided by them are approximately the same is called **'Food Exchange'.**

Substitution of one food item with the other in such a way that the nutrients provided by them are the same is called "Food exchange".

If you are modifying the same meal for different family members, then how will you decide on how much of one item is equivalent to another one? If you are not sure about how to go about exchanging one food item with another in the correct proportion, then you may not be able to fulfill everyone's requirements correctly. For example, if you are exchanging milk with egg then you should know how much of milk is equivalent to one egg or if one does not want to eat an egg, in that case, how much of pulses should be given instead?

Food exchanges help you to modify the diet for an individual according to needs, likes, dislikes and food habits and help you to make the diet more flexible and interesting. The following illustration gives you a fair idea about the exchanges that can be done among various foods so that the nutrients derived by these foods remain the same.

Protein Rich Foods

Milk Egg Meat Pulses Curd Paneer Butter Milk

1 glass of milk = 1 egg = 1 medium size katori meat = 1 big katori pulses = 1 big katori curd = 1/4 cup of paneer = 3 cups of butter milk
