Activity : 5

Give the capacity of the following

1. One tea cup – gms
2. One teaspoon – gms
3. One tablespoon – gms
4. ¼ cup – tsp
5. 2 table spoon – tsp

SUMMARY

- Each day our body needs a supply of a number of nutrients to carry out its activities efficiently. Nutrients are needed by humans in specific amounts to ensure good health and well being.
- Recommended Dietary Allowances (RDA) are estimates of intakes of nutrients which individuals in a population group need to consume to ensure that the physiological needs of all subjects in that population are met
- Recommended dietary allowances of an individual depend on many factors like Age, Sex, Physical activity, and Physiological state
- In order to meet the recommended dietary allowances, it is important to eat a balanced diet
- A "Balanced Diet" can be defined as one which contains different types of foods in such quantities and proportions that the need for calories, minerals, vitamins, and other nutrients is adequately met and a small provision is made for extra nutrients to, withstand short durations of leanness.
- A balanced diet should provide around 60-70% of total calories from carbohydrates, 10-12% from protein and 20-25% of total calories from fat.
- Meal planning helps in planning a balanced diet. Meal planning is a simple practical exercise which involves applying the knowledge of food, nutrient requirement, and individual preferences to plan adequate and acceptable meals.
- Meal planning helps to meet the nutritional requirements of the family, fulfills family needs, saves time and energy, provides variety, gives satiety and considers the individual likes and dislikes
- Food exchanges help us to modify the diet of an individual according to their needs, likes, dislikes and food habits and help us to make the diet more flexible and interesting
- The income of the family or more specifically, the amount of money available for food per person influence the kind and amount of food to be included in each meal. There are many ways in which one can ensure nutritious meals without increasing the cost.

A-Z GLOSSARY

Terms	Meanings
Activity level:	Level of activity of a person-sedentary (light), moderate or heavy. Activity level is chiefly related to the occupation of an individual.
Pregnancy:	The state of carrying a developing embryo or fetus within the female body. Pregnancy lasts for about nine months
Lactation:	Period when the mother breastfeeds her infant.
