iv. Non vegetarian foods

A small amount of hard boiled yolk of egg is given to start with and if the infant tolerates, the amount maybe gradually increased to a complete yolk of an egg. Yolk is a good source of vitamin A, iron and protein. Soft custard is also a suitable way in which to introduce egg yolk.

v. Pulses

Well cook pulses along with cereals in the form of kichidi / pongal can be given or can be made into porridge. Pulse and meat preparation can be given alternate days.

2.3.7 Points to be considered while introducing weaning foods

- Introduce only one food at a time
- Allow the infant to become familiar with the foods before trying to give another
- Give a very small amounts of any new food at the beginning, for example, one teaspoon full or less.
- At first strained fruits, vegetables and cereals are given.
- Variety in choice of food is important
- If, after several trials, the baby has an acute dislike for a particular food, omit that item for a week or two and then try again.
- Food should be given between breast feeds.
- Give freshly prepared food
- By one year, the infant can be given family diet, modified, in small quantities but at frequent intervals in addition to milk. The best indication of adequacy of the diet is the growth pattern of the child.

2.3.8 Low cost supplementary foods

Indian mothers wean infant into the traditional adult diet because of their ignorance of low cost weaning foods and also because of in capacity to buy expensive commercial foods.

Table 2.9 Low cost supplementary foods

Name of the product	Composition
Indian multipurpose food (C F T R I)	Low fat groundnut flour and Bengal gram flour (75:25) fortified with vitamins A and D, B1 B2 and calcium carbonate. Contains 40 percent protein.
