- Coconut water and fresh fruit juice will improve immunity and also provide vital vitamins.
- A minimum of two glasses of skimmed milk is a good midnight snack when it is exam time or when awake late for projects.
- Egg or chicken sandwich is a better option while meeting up with friends or after play.
- A milkshake is always a better choice as compared to an aerated drink.
- Breakfast is the most important meal, as it ensures minimum brain damage due to an overnight fast.
- A water intake of three-four litres per day clears all toxins from the body and keeps the skin healthy and glowing.
- A handful of raisins and almonds is a very good snack between during long hours of studies.
- Avoid foods that are processed or canned as they contain preservatives which can be carcinogenic in future life.
- Foods that are rich in sugar are responsible for obesity, gasse in the stomach and also cause skin eruptions.
- Fish, chicken, eggs are good sources of protein which help in growth and repair of worn out tissues.
- Always eat your breakfast and at least one meal with plenty of vegetables that is healthy and nutritious, at home.
- Sit and eat peacefully, because body absorbs nutrition under minimum anxiety and stress from the food we eat.
- Avoid crash diet and skipping meals to keep the metabolism high and also help in fat loss.
- Exercise daily for five days a week to ensure good health and a fit body.
- Whenever you happen to eat out in a restaurant, have a fresh pineapple juice along with your meal to prevent indigestion.
- Fried and oily foods and foods with cheese and cream take a long time to digest thus cause indigestion and are a very strong reason for pimples and obesity.
- Walnuts and dried apricots enhance brain function and concentration.
- Eat whenever you are hungry, not because everyone around is eating.
- Adolescents can be encouraged to cook their own healthy dishes

Thus from this lesson we have learnt that nutrient needs rise dramatically as children enter the rapid growth phase of the teen years. The busy lifestyles of adolescents add to the challenge of meeting their nutrient needs-especially for iron and calcium. Nutrition and lifestyle choices people make as children and adolescents have long-term as well as immediate effects on their health.
