5.2.3. Restricted diets:

Restricted diets are a class of special diets that limit or restrict the amount of specific nutrients like calories, fats , salt and other substances based on the patient's medical needs. For example a restricted fat diet allows low fat version of milk, cheese and ice cream but does not place limit on the amount of fresh fruits and vegetables a patient may consume.

5.2.4. Regular diets:

Regular diets also known as normal diets or house diets are used to maintain or achieve the highest level of nutrition in patients who do not have special needs related to illness or injury. This kind of diet is used for ambulatory or bed patients. While regular diets are not customized to cater to personal choices, they are altered to meet the needs of the patient's age, condition
