- Managing budget resources.
- Establishing standards of sanitation, safety, and security;
- Developing menus and evaluating client acceptance;
- Developing specifications for the procurement of food, equipment, and supplies;
- Planning layout designs and determining equipment requirements.
- Conducting studies to improve the operations, efficiency, and quality of food service systems.

5.4.2 Clinical Dietitians

A clinical dietitian is a member of the health care team and is primarily concerned with

therapeutic diets for individuals or groups who are located in hospitals, normal and extended care facilities, and long-term care facilities.

The clinical dietitian assesses nutritional needs and the nutritional status of individuals through dietary histories of individuals, laboratory values, anthropometric tests and similar methods.

counsels individuals and families on dietary plans, adapting plans to the individual's therapeutic needs and life style, participates in 'health team rounds' and serves as the consultant on nutritional care, compiles or develops educational materials and uses them as an aid in nutrition education, interprets and utilizes pertinent current research related to nutritional care.

The largest percentage of dietitians are clinical dietitians involved in patient care, and may be responsible for one or more wards or clinics which treat patients with general or specialized problems, such as kidney disease, diabetes, gastro-intestinal disease, spinal cord injury and numerous others.

The area of critical care and nutrition support requires highly specialized knowledge on the part of the clinical dietitian in nutritional assessment, parenteral and enteral nutrition and critical care delivery systems.

5.4.3 Community Dietitian

The community dietitian functions as a member of the community health team, assessing the nutritional needs of individuals and groups within the community. Planning, coordinating and evaluating the nutritional component of health care services. The community dietitian, is based in a hospital and participates in out-placement programs for patients in private homes, group care facilities or nursing homes. The dietitian monitors and evaluates the nutritional services provided to these patients.

Duties of a Community Dietitian include:

- Developing and implementing a plan of care based on nutritional needs and available sources
- Evaluating food service systems and making recommendations
- Planning and conducting studies promoting and providing training in nutrition.

5.4.4. Research Dietitian

The primary purpose of a Research Dietitian is to plan, investigate, interpret, evaluate and expand knowledge in one or more areas of dietetics.

Research dietitians initiate, plan, carry out, and interpret their own research. It should also be noted that clinical dietitians are frequently called upon to assist physicians in
