experimental or research projects of limited scope, such as evaluating the course of a given diet on the status of a patient.

5.4.5. Teaching Dietitian

The teaching dietitian usually has advanced preparation in dietetics or education, and is responsible for planning, conducting, and evaluating training programs, which may include responsibility for an internship program. The responsibilities for teaching varies. For example, the continuing development of the professional dietetic staff, the in service training of the non professional staff and the instruction for patients is the function of all dietetic services. However, there are some situations where one or more dietitians are involved in the planning and conducting of training for dietetic interns, coordinated undergraduate students, medical students, medical and surgical interns, nurses, nursing students, house staff, and others in the allied health services.

5.4.6. Consultant Dietitian

A consultant dietitian, with experience in administrative or clinical dietetic practice, affects the management of resources by providing advice or services in nutritional care. The consultant dietitian performs functions such as evaluating food service systems and nutritional care plans, developing menus, budgets, records systems and educational materials. Recommending layout design and equipment needs, as well as sanitation, safety and security procedures. Counseling clients and consulting with health care teams.

5.5.1. Role of a dietitian

1. Identifying nutrition problems and assessing the nutritional status of patients in a clinical setting.
2. Developing diet plans and counseling patients on special diet modifications.
3. Assessing, promoting, protecting, and enhancing the health of the general public in a community setting and providing strategies for prevention of nutrition-related diseases.
4. Managing a cost effective food production operation, distributing high quality meals/snacks, monitoring sanitation and safety standards in a food service setting.
5. Operating private consulting practices to provide expertise in nutrition, as well as promote health and prevent disease.
6. Working with individuals, groups, workplaces and media to provide dietary advice for healthy living.
7. Working with food and pharmaceutical companies to provide research, develop products, educate consumers, promote and market better food and nutritional products in a business setting.
8. Teaching nutrition, food chemistry, or food service administration to students in any health profession and at all levels of education.

5.5.2. Responsibilities

1. Be listened to and treated with respect and consideration.
2. Services without exploitation.
3. Services without discrimination, of age, sex, culture, ethnicity, religion, political belief, sexual orientation or health status.
