Source: Macroeconomic Assessment of Demonetization RBI, dated 10 March 2017; Annex Table 2, p. 46.

Table 3 shows GDP growth estimates by other agencies such as the World Bank, IMF, credit rating agencies and leading banks for two consecutive years, highlighting the impact of demonetization.

The drop in GDP growth as a result of the note ban in these estimates averages 1 per cent for 2016–17 and 0.5 per cent for 2017–18.

In February 2018, the CSO and the RBI also lowered the economic growth projections for the year 2017–18 to 6.4 per cent and 6.6 per cent respectively (though this was partly attributed to the Goods and Services Tax [GST] rolled out in July 2017).

If we assume these figures, howsoever conservative, to be correct, then the cost to India of an average of even a one per cent lower
