The minister also said, 'The data also showed that the average resale price of properties witnessed a dip of 10–15 per cent immediately after demonetization… In fact, there could be further price correction and the Ministry is optimistic most of the non-serious and fly-by-night players will vanish soon.'

However, when asked in the Rajya Sabha for the data that supported the claim that demonetization had brought down realty prices, the Minister was forced to admit in a written reply[50] to the Parliament that 'No such study has been carried out by the Ministry of Housing and Urban Affairs.'

In fact, data shows that real estate prices actually increased across the country, both during and immediately after demonetization. The RBI publishes an all India House Price Index (HPI) on its website each quarter.

As shown below, house prices increased every quarter between June 2016 and December 2017, showing that demonetization failed in this objective as well.

Table 15: Change in Housing Prices Post Demonetization

Quarter	Year on Year Growth	Sequential Increase Per cent (Q on Q)
July–September 2016	7.7 %	
October–December 2016	8.3 %	2.3 %
January–March 2017	10.4 %	2.2 %
April–June 2017	8.7 %	3.8 %
July–September 2017	7.3 %	0.4 %
