11. *The Economic Times* reported on 13 July 2018 that during the probe into the 26 November 2008 attacks on Mumbai, the National Investigation Agency found that David Headley, one of the instigators of the attacks, had been provided with fake Indian currency by Pakistan's Inter-Services Intelligence. 'David Headley bares all on terror financing by ISI', *The Economic Times* dated 13 July 2018, https://economictimes.indiatimes.com/news/defence/david-headley-bares-all-on-terror-financing-by-isi/articleshow/50941498.cms
12. Lok Sabha, Unstarred Question No.3285 dated 5 August 2016.
13. Press release by Ministry of Finance dated 12 March 2013.
14. The RBI has taken several steps to counter fake currency. Most notably the Currency Verification and Processing Systems (CVPS) installed at RBI's offices since 2001 – the Ultraviolet detectors at Bank branches, the Note Sorting Machines (NSM) capable of detecting counterfeit banknotes at currency chests since 2005; new security features in all bank notes issued since 2005–6 (silver colour shift machine readable security thread, intaglio printing, see through register, electrotype watermark, printing with Optically Variable colour shifting ink, coloured optical fluorescence fibres and numbers printed in fluorescent ink that show when exposed to ultra violet detectors, latent image of the denominational value, and micro-letterings); withdrawal in 2014 of all bank notes issued prior to 2005; and additional security features in currency notes printed since 2015–16 (ascending size of numerals, angular bleed lines to help visually challenged persons, and enlarged identification marks on the ₹500 and ₹1,000 notes). In addition, the RBI's Department of Currency Management defines the guidelines for the Detection and Impounding of Counterfeit Notes in Master Circular 2015–16. The circular lays down a stringent and detailed procedure to be complied with by banks for detecting, recording and confiscating counterfeit notes with stringent penalties for non-compliance.
15. RBI Annual Report 2016–17.
16. Stated by the Minister of State for Finance in response to a query in the Lok Sabha on 3 February 2017.
17. 'The total expenditure incurred on security printing stood at ₹79.65 billion (₹7,965 crore) for the period (July 2016–June 2017) as against ₹34.2 billion during 2015–16. The upsurge in expenditure during the year was on account of change in the production plan of printing presses due to the introduction of new design notes in higher denominations as well as the requirement of larger volume of notes for replacement of the demonetized currency.' 2016–17 and 2017–18 RBI Annual Reports.
