The MySQLi extension contains the following important functions which are related to MySQL database connectivity and management.

- Mysqli_connect() Function
- Mysqli_close() Function
- Mysqli_query()Function

9.1.1 Database Connections:

Before accessing MySQL Database, connect to Database Server machine via PHP scripting language using Mysqli_connect() Function.

Syntax:

```
mysqli_connect("Server Name ","User Name","Password","DB Name");
```

This function requires four parameters to connect to database server. Database Server name, Database username, password and Database Name.

9.1.2 Managing Database Connections

The below code describes managing database connection methods and features.

```
<?php
$servername = "localhost";
$username = "username";
$password = "password";

$DB_name = "School_DB";

$conn = mysqli_connect($servername, $username, $password,$DB_name);

if (!$conn) {
   die("Connection failed: " . mysqli_connect_error());
}
```
