

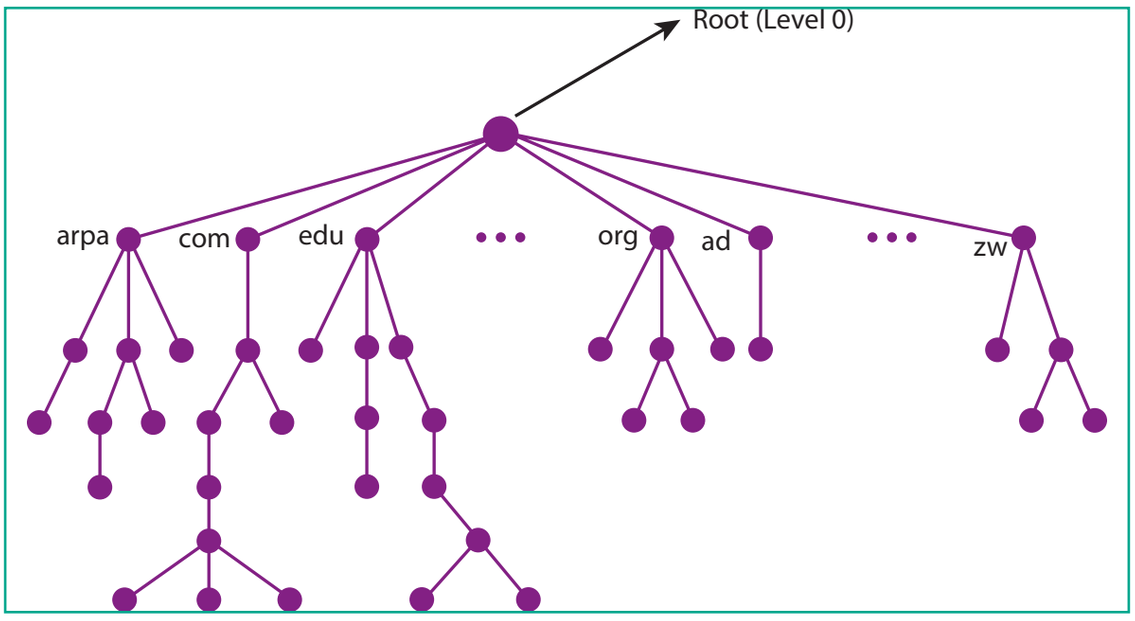

Figure 12.5 Domain Name Space

Figure 12.5 represent the domain name space where the root element is present at the top most level i.e., level 0. The root element always represents the NULL string (empty string). The next level to the root element is node (children of root element). Each node in the tree has a **label** and a **domain name**.

Label

It is a string which can have maximum of 63 characters. Each node in that level should have different labels thereby assuring the individuality of the domain name.

In other words, Labels are the names given to domains. **Domain** is a sub tree in domain name space tree structure. The domain can be further divided into sub domains.
