POINTS TO REMEMBER

- Open Source denotes to some program whose source code is made available for usage or reform as users or other developers see appropriate
- In simulators, the computer network is typically demonstrated with devices, traffic etc. and the performance are evaluated.
- A significant output of simulation is the trace files. Trace files can document every incident that happened in the simulation and are used for examination.
- NS2 has C++ and Object-oriented Tool Command Language (OTcl) of languages 2.
- It link together for C++ and the OTcl using TclCL.
- Open NMS (Network Management System) is a free and open-source initiative grade network monitoring and network management platform.
- Network monitoring software notifications help the user/administrator for fixed errors.

A-Z GLOSSARY

NS2	Network Simulation 2
OpenNMS	First Open Source Network Management Software
Trace File	A document file, consists of every incident happens in a simulation
OTCL	Object-oriented Tool Command Language
FCAPS	Fault, configuration, accounting, performance, security
GNU	General Public License
SSFNet	Scalable Simulation Framework Net Models
API	APPLICATION PROGRAM INTERFACE
SOURCE CODE	Set of Instructions that decide, how the software should work
BOSS	Bharat Operating System Solutions
C-DAC	Centre for Development of Advanced Computing
