their cycles. When compared to other models, the value per transaction in B2B transaction is high, because of bulk purchase. The company also might get the advantage of discounts on bulk purchases. See Figure 15.7

Out-sourcing and Off-shoring are generally associated with B2B E-Commerce.

- If a company's work is hired to another company, it would be termed as out-sourcing.
- If the work is outsourced to a company, which is outside its own country, it is called as off-shoring.

- **Business to Consumer (B2C)**

In B2C E-Commerce, commercial transactions take place between business firms and their consumers. It is the direct trade between companies and end-consumers via the Internet. B2C companies sell goods, information or services to customers through online in a more personalized dynamic environment and is considered as real competitor for a traditional storekeeper. An example of B2C transaction is a book company selling books to customers. This mode is intended to benefit the consumer and can say B2C E-Commerce works as 'retail store' over Internet. See Figure 15.8

- **Business to Government (B2G)**

B2G is a business model that refers to business organizations sells products, services or information to Governments or to its administrations. In other words, when a company get paid for its goods, services by the Government through Internet it is called as B2G model. e.g. The Government or its administration buys laptops for students. See Figure 15.9
