- **Government to Consumer (G2C)**

G2C in E-Commerce is very similar to C2G. Here the Government provides platform for its citizens to avail its services and information through the Internet. The services may be issue of certificates through online.e.g. https://csc.gov.in/governmenttocitizen. See Figure 15.15

- **Government to Government (G2G)**

G2G is the online (usually non-commercial) interaction between Government organizations or departments. G2G's principle objective is to implement e-governance rather than commerce. G2G model in e-governance involves distributing data or information between its agencies/departments. G2G systems can be classified into two types

- Internal facing or local level - joining up a single Government's bureaucracy. e.g. https://www.nic.in/
- External facing or international level - joining up multiple Governments' bureaucracy.

See Figure 15.16

15.5 E-Commerce Revenue Models

Apart from regular selling of commodities, today there are many other ways by which companies can make money from the Internet. The other forms of E-Commerce activities are:

1. Affiliate site is a form of third party marketing in which the site owner gets paid based on the performance. The affiliate site may be a price comparison service or shopping directories or review sites or blogs that contain a link to a normal retailing site and are paid when a customer makes a purchase through it. The affiliate site usually attracts visitors by offering more information and tutorials on some specific product or a topic. See Figure 15.17 to Figure 15.23
