2. On an empty area of the page or pasteboard, do one of the following:

   Click the I-beam where you want to insert text. (Refer Figure 2.10) This creates a text block to the width of the column or page. By default, the insertion point jumps to the left side of the text block.

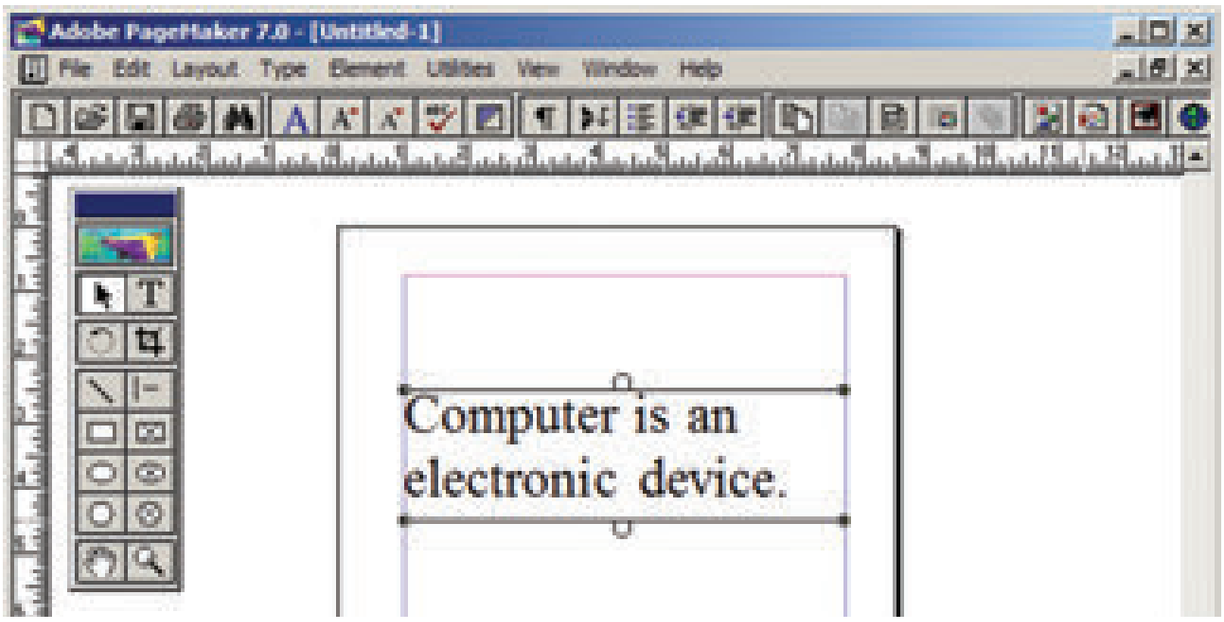

Figure 2.10

3. Type the text you want.

   Unlike with a text frame, you do not see the borders of a text block until you click the text with the pointer tool. Refer 2.11
