2.7.2 Moving a Text Block

To move a block without changing its shape, place the cursor anywhere inside the block, and click and drag it to the required position. Refer 2.12

2.7.3 Resizing a Text Block

When you select a text block with the Pointer tool, the block's boundaries become visible. Two handles are seen above and below the text block. These handles are called **Windowshades**. There is a dark square on both ends of the handle. These are used to change the size of the text block. Refer Figure 2.13 to Figure 2.15
