8 Overriding Conditions

8.1 unscope

You can specify certain conditions to be removed using the `unscope` method. For example:

```
Article.where('id > 10').limit(20).order('id asc').unscope(:order)
```

The SQL that would be executed:

```
SELECT * FROM articles WHERE id > 10 LIMIT 20

# Original query without `unscope`
SELECT * FROM articles WHERE id > 10 ORDER BY id asc LIMIT 20
```

You can also unscope specific `where` clauses. For example:

```
Article.where(id: 10, trashed: false).unscope(where: :id)
# SELECT "articles".* FROM "articles" WHERE trashed = 0
```

A relation which has used `unscope` will affect any relation it is merged in to:

```
Article.order('id asc').merge(Article.unscope(:order))
# SELECT "articles".* FROM "articles"
```

8.2 only

You can also override conditions using the `only` method. For example:

```
Article.where('id > 10').limit(20).order('id desc').only(:order,
:where)
```

The SQL that would be executed:

```
SELECT * FROM articles WHERE id > 10 ORDER BY id DESC

# Original query without `only`
SELECT "articles".* FROM "articles" WHERE (id > 10) ORDER BY id desc LIMIT
20
```

8.3 reorder

The `reorder` method overrides the default scope order. For example:

```
class Article < ActiveRecord::Base
  has_many :comments, -> { order('posted_at DESC') }
end

Article.find(10).comments.reorder('name')
```

The SQL that would be executed:

```
SELECT * FROM articles WHERE id = 10
SELECT * FROM comments WHERE article_id = 10 ORDER BY name
```

In case the `reorder` clause is not used, the SQL executed would be:

```
SELECT * FROM articles WHERE id = 10
SELECT * FROM comments WHERE article_id = 10 ORDER BY posted_at DESC
```

8.4 reverse_order

The `reverse_order` method reverses the ordering clause if specified.

```
Client.where("orders_count > 10").order(:name).reverse_order
```

The SQL that would be executed:

```
SELECT * FROM clients WHERE orders_count > 10 ORDER BY name DESC
```

If no ordering clause is specified in the query, the `reverse_order` orders by the primary key in reverse order.

```
Client.where("orders_count > 10").reverse_order
```
