The SQL that would be executed:

```
SELECT * FROM clients WHERE orders_count > 10 ORDER BY clients.id DESC
```

This method accepts **no** arguments.

8.5 `rewhere`

The `rewhere` method overrides an existing, named where condition. For example:

```
Article.where(trashed: true).rewhere(trashed: false)
```

The SQL that would be executed:

```
SELECT * FROM articles WHERE `trashed` = 0
```

In case the `rewhere` clause is not used,

```
Article.where(trashed: true).where(trashed: false)
```

the SQL executed would be:

```
SELECT * FROM articles WHERE `trashed` = 1 AND `trashed` = 0
```

9 Null Relation

The `none` method returns a chainable relation with no records. Any subsequent conditions chained to the returned relation will continue generating empty relations. This is useful in scenarios where you need a chainable response to a method or a scope that could return zero results.

```
Article.none # returns an empty Relation and fires no queries.
# The visible_articles method below is expected to return a Relation.
@articles = current_user.visible_articles.where(name: params[:name])

def visible_articles
  case role
  when 'Country Manager'
    Article.where(country: country)
  when 'Reviewer'
    Article.published
  when 'Bad User'
    Article.none # => returning [] or nil breaks the caller code in
this case
  end
end
```

10 Readonly Objects

Active Record provides `readonly` method on a relation to explicitly disallow modification of any of the returned objects. Any attempt to alter a readonly record will not succeed, raising an `ActiveRecord::ReadOnlyRecord` exception.

```
client = Client.readonly.first
client.visits += 1
client.save
```

As `client` is explicitly set to be a readonly object, the above code will raise an `ActiveRecord::ReadOnlyRecord` exception when calling `client.save` with an updated value of*visits*.

11 Locking Records for Update

Locking is helpful for preventing race conditions when updating records in the database and ensuring atomic updates.

Active Record provides two locking mechanisms:
