partial you can refer to `product_counter` to tell you how many times the partial has been rendered. This does not work in conjunction with the `as: :value` option.

You can also specify a second partial to be rendered between instances of the main partial by using the `:spacer_template` option:

3.4.7 Spacer Templates

```
<%= render partial: @products, spacer_template: "product_ruler" %>
```

Rails will render the `_product_ruler` partial (with no data passed in to it) between each pair of `_product` partials.

3.4.8 Collection Partial Layouts

When rendering collections it is also possible to use the `:layout` option:

```
<%= render partial: "product", collection: @products, layout:
"special_layout" %>
```

The layout will be rendered together with the partial for each item in the collection. The current object and object_counter variables will be available in the layout as well, the same way they do within the partial.

3.5 Using Nested Layouts

You may find that your application requires a layout that differs slightly from your regular application layout to support one particular controller. Rather than repeating the main layout and editing it, you can accomplish this by using nested layouts (sometimes called sub-templates). Here's an example:

Suppose you have the following `ApplicationController` layout:

- `app/views/layouts/application.html.erb`

```
<html>
<head>
  <title><%= @page_title or "Page Title" %></title>
  <%= stylesheet_link_tag "layout" %>
  <style><%= yield :stylesheets %></style>
</head>
<body>
  <div id="top_menu">Top menu items here</div>
  <div id="menu">Menu items here</div>
  <div id="content"><%= content_for?(:content) ? yield(:content)
: yield %></div>
</body>
</html>
```

On pages generated by `NewsController`, you want to hide the top menu and add a right menu:

- `app/views/layouts/news.html.erb`

```
<% content_for :stylesheets do %>
  #top_menu {display: none}
  #right_menu {float: right; background-color: yellow; color:
black}
<% end %>
<% content_for :content do %>
  <div id="right_menu">Right menu items here</div>
  <%= content_for?(:news_content) ? yield(:news_content) : yield
%>
<% end %>
<%= render template: "layouts/application" %>
```

That's it. The News views will use the new layout, hiding the top menu and adding a new right menu inside the "content" div.
