HTTP Verb	Path	Controller#Action	Named Helper
GET	/admin/articles/:id	articles#show	article_path(:id)
GET	/admin/articles/:id/edit	articles#edit	edit_article_path(:id)
PATCH/PUT	/admin/articles/:id	articles#update	article_path(:id)
DELETE	/admin/articles/:id	articles#destroy	article_path(:id)

If you need to use a different controller namespace inside a `namespace` block you can specify an absolute controller path, e.g: `get '/foo' => '/foo#index'`.

2.7 Nested Resources

It's common to have resources that are logically children of other resources. For example, suppose your application includes these models:

```
class Magazine < ActiveRecord::Base
  has_many :ads
end

class Ad < ActiveRecord::Base
  belongs_to :magazine
end
```

Nested routes allow you to capture this relationship in your routing. In this case, you could include this route declaration:

```
resources :magazines do
  resources :ads
end
```

In addition to the routes for magazines, this declaration will also route ads to an `AdsController`. The ad URLs require a magazine:

HTTP Verb	Path	Controller#Action	Used for
GET	/magazines/:magazine_id/ads	ads#index	display a list of all ads for a specific magazine
GET	/magazines/:magazine_id/ads/new	ads#new	return an HTML form for creating a new ad belonging to a specific magazine
POST	/magazines/:magazine_id/ads	ads#create	create a new ad belonging to a specific magazine
GET	/magazines/:magazine_id/ads/:id	ads#show	display a specific ad belonging to a specific magazine
