2.8 Routing concerns

Routing Concerns allows you to declare common routes that can be reused inside other resources and routes. To define a concern:

```
concern :commentable do
  resources :comments
end

concern :image_attachable do
  resources :images, only: :index
end
```

These concerns can be used in resources to avoid code duplication and share behavior across routes:

```
resources :messages, concerns: :commentable

resources :articles, concerns: [:commentable, :image_attachable]
```

The above is equivalent to:

```
resources :messages do
  resources :comments
end

resources :articles do
  resources :comments
  resources :images, only: :index
end
```

Also you can use them in any place that you want inside the routes, for example in a scope or namespace call:
