```
namespace :articles do
  concerns :commentable
end
```

2.9 Creating Paths and URLs From Objects

In addition to using the routing helpers, Rails can also create paths and URLs from an array of parameters. For example, suppose you have this set of routes:

```
resources :magazines do
  resources :ads
end
```

When using `magazine_ad_path`, you can pass in instances of `Magazine` and `Ad` instead of the numeric IDs:

```
<%= link_to 'Ad details', magazine_ad_path(@magazine, @ad) %>
```

You can also use `url_for` with a set of objects, and Rails will automatically determine which route you want:

```
<%= link_to 'Ad details', url_for([@magazine, @ad]) %>
```

In this case, Rails will see that `@magazine` is a `Magazine` and `@ad` is an `Ad` and will therefore use the `magazine_ad_path` helper. In helpers like `link_to`, you can specify just the object in place of the full `url_for` call:

```
<%= link_to 'Ad details', [@magazine, @ad] %>
```

If you wanted to link to just a magazine:

```
<%= link_to 'Magazine details', @magazine %>
```

For other actions, you just need to insert the action name as the first element of the array:

```
<%= link_to 'Edit Ad', [:edit, @magazine, @ad] %>
```

This allows you to treat instances of your models as URLs, and is a key advantage to using the resourceful style.

2.10 Adding More RESTful Actions

You are not limited to the seven routes that RESTful routing creates by default. If you like, you may add additional routes that apply to the collection or individual members of the collection.

2.10.1 Adding Member Routes

To add a member route, just add a `member` block into the resource block:

```
resources :photos do
  member do
    get 'preview'
  end
end
```

This will recognize `/photos/1/preview` with GET, and route to the `preview` action of `PhotosController`, with the resource id value passed in `params[:id]`. It will also create the `preview_photo_url` and `preview_photo_path` helpers.

Within the block of member routes, each route name specifies the HTTP verb will be recognized. You can use `get`, `patch`, `put`, `post`, or `delete` here . If you don't have multiple `member` routes, you can also pass `:on` to a route, eliminating the block:

```
resources :photos do
  get 'preview', on: :member
end
```
