This declaration constrains the `:id` parameter to match the supplied regular expression. So, in this case, the router would no longer match `/photos/1` to this route. Instead, `/photos/RR27` would match.
You can specify a single constraint to apply to a number of routes by using the block form:

```
constraints(id: /[A-Z][A-Z][0-9]+/) do
  resources :photos
  resources :accounts
end
```

Of course, you can use the more advanced constraints available in non-resourceful routes in this context.

By default the `:id` parameter doesn't accept dots - this is because the dot is used as a separator for formatted routes. If you need to use a dot within an `:id` add a constraint which overrides this - for example `id: /[^\/]+/` allows anything except a slash.

4.3 Overriding the Named Helpers

The `:as` option lets you override the normal naming for the named route helpers. For example:
`resources :photos, as: 'images'`
will recognize incoming paths beginning with `/photos` and route the requests to `PhotosController`, but use the value of the :as option to name the helpers.

HTTP Verb	Path	Controller#Action	Named Helper
GET	/photos	photos#index	images_path
GET	/photos/new	photos#new	new_image_path
POST	/photos	photos#create	images_path
GET	/photos/:id	photos#show	image_path(:id)
GET	/photos/:id/edit	photos#edit	edit_image_path(:id)
PATCH/PUT	/photos/:id	photos#update	image_path(:id)
DELETE	/photos/:id	photos#destroy	image_path(:id)

4.4 Overriding the `new` and `edit` Segments

The `:path_names` option lets you override the automatically-generated `new` and `edit` segments in paths:
`resources :photos, path_names: { new: 'make', edit: 'change' }`
This would cause the routing to recognize paths such as:

```
/photos/make
/photos/1/change
```

The actual action names aren't changed by this option. The two paths shown would still route to the `new` and `edit` actions.

If you find yourself wanting to change this option uniformly for all of your routes, you can use a scope.

```
scope path_names: { new: 'make' } do
  # rest of your routes
end
```
