```
end
```

Defined in `active_support/core_ext/string/inflections.rb`.

5.11.13 `humanize`

The method `humanize` tweaks an attribute name for display to end users.

Specifically performs these transformations:

- Applies human inflection rules to the argument.
- Deletes leading underscores, if any.
- Removes a "_id" suffix if present.
- Replaces underscores with spaces, if any.
- Downcases all words except acronyms.
- Capitalizes the first word.

The capitalization of the first word can be turned off by setting the +:capitalize+ option to false (default is true).

```
"name".humanize                           # => "Name"
"author_id".humanize                      # => "Author"
"author_id".humanize(capitalize: false) # => "author"
"comments_count".humanize                 # => "Comments count"
"_id".humanize                            # => "Id"
```

If "SSL" was defined to be an acronym:

```
'ssl_error'.humanize # => "SSL error"
```

The helper method `full_messages` uses `humanize` as a fallback to include attribute names:

```
def full_messages
  map { |attribute, message| full_message(attribute, message) }
end

def full_message
  ...
  attr_name = attribute.to_s.tr('.', '_').humanize
  attr_name = @base.class.human_attribute_name(attribute, default:
attr_name)
  ...
end
```

Defined in `active_support/core_ext/string/inflections.rb`.

5.11.14 `foreign_key`

The method `foreign_key` gives a foreign key column name from a class name. To do so it demodulizes, underscores, and adds "_id":

```
"User".foreign_key           # => "user_id"
"InvoiceLine".foreign_key    # => "invoice_line_id"
"Admin::Session".foreign_key # => "session_id"
```

Pass a false argument if you do not want the underscore in "_id":

```
"User".foreign_key(false) # => "userid"
```

Associations use this method to infer foreign keys, for example `has_one` and `has_many` do this:

```
# active_record/associations.rb
foreign_key = options[:foreign_key] ||
reflection.active_record.name.foreign_key
```

Defined in `active_support/core_ext/string/inflections.rb`.
