```
d.sunday                    # => Sun, 09 May 2010

d = Date.new(2012, 9, 10)   # => Mon, 10 Sep 2012
d.monday                    # => Mon, 10 Sep 2012

d = Date.new(2012, 9, 16)   # => Sun, 16 Sep 2012
d.sunday                    # => Sun, 16 Sep 2012
```

15.1.2.6 prev_week, next_week

The method next_week receives a symbol with a day name in English (default is the thread local Date.beginning_of_week, or config.beginning_of_week, or :monday) and it returns the date corresponding to that day.

```
d = Date.new(2010, 5, 9) # => Sun, 09 May 2010
d.next_week              # => Mon, 10 May 2010
d.next_week(:saturday)   # => Sat, 15 May 2010
```

The method prev_week is analogous:

```
d.prev_week              # => Mon, 26 Apr 2010
d.prev_week(:saturday)   # => Sat, 01 May 2010
d.prev_week(:friday)     # => Fri, 30 Apr 2010
```

prev_week is aliased to last_week.

Both next_week and prev_week work as expected when Date.beginning_of_week or config.beginning_of_week are set.

15.1.2.7 beginning_of_month, end_of_month

The methods beginning_of_month and end_of_month return the dates for the beginning and end of the month:

```
d = Date.new(2010, 5, 9) # => Sun, 09 May 2010
d.beginning_of_month     # => Sat, 01 May 2010
d.end_of_month           # => Mon, 31 May 2010
```

beginning_of_month is aliased to at_beginning_of_month, and end_of_month is aliased to at_end_of_month.

15.1.2.8 beginning_of_quarter, end_of_quarter

The methods beginning_of_quarter and end_of_quarter return the dates for the beginning and end of the quarter of the receiver's calendar year:

```
d = Date.new(2010, 5, 9) # => Sun, 09 May 2010
d.beginning_of_quarter   # => Thu, 01 Apr 2010
d.end_of_quarter         # => Wed, 30 Jun 2010
```

beginning_of_quarter is aliased to at_beginning_of_quarter, and end_of_quarter is aliased to at_end_of_quarter.

15.1.2.9 beginning_of_year, end_of_year

The methods beginning_of_year and end_of_year return the dates for the beginning and end of the year:

```
d = Date.new(2010, 5, 9) # => Sun, 09 May 2010
d.beginning_of_year      # => Fri, 01 Jan 2010
d.end_of_year            # => Fri, 31 Dec 2010
```

beginning_of_year is aliased to at_beginning_of_year, and end_of_year is aliased to at_end_of_year.

15.1.3 Other Date Computations

15.1.3.1 years_ago, years_since

The method years_ago receives a number of years and returns the same date those many years ago:

```
date = Date.new(2010, 6, 7)
date.years_ago(10) # => Wed, 07 Jun 2000
```

years_since moves forward in time:

```
date = Date.new(2010, 6, 7)
date.years_since(10) # => Sun, 07 Jun 2020
```

If such a day does not exist, the last day of the corresponding month is returned:
