16.1 Calculations

All the following methods are defined in `active_support/core_ext/date_time/calculations.rb`.

The class `DateTime` is a subclass of `Date` so by loading `active_support/core_ext/date/calculations.rb` you inherit these methods and their aliases, except that they will always return datetimes:

```
yesterday
tomorrow
beginning_of_week (at_beginning_of_week)
end_of_week (at_end_of_week)
monday
sunday
weeks_ago
prev_week (last_week)
next_week
months_ago
months_since
beginning_of_month (at_beginning_of_month)
end_of_month (at_end_of_month)
prev_month (last_month)
next_month
beginning_of_quarter (at_beginning_of_quarter)
end_of_quarter (at_end_of_quarter)
beginning_of_year (at_beginning_of_year)
end_of_year (at_end_of_year)
years_ago
years_since
prev_year (last_year)
next_year
```

The following methods are reimplemented so you do **not** need to load `active_support/core_ext/date/calculations.rb` for these ones:

```
beginning_of_day (midnight, at_midnight, at_beginning_of_day)
end_of_day
ago
since (in)
```

On the other hand, `advance` and `change` are also defined and support more options, they are documented below.

The following methods are only implemented in `active_support/core_ext/date_time/calculations.rb` as they only make sense when used with a `DateTime` instance:

```
beginning_of_hour (at_beginning_of_hour)
end_of_hour
```

16.1.1 Named Datetimes

16.1.1.1 `DateTime.current`

Active Support defines `DateTime.current` to be like `Time.now.to_datetime`, except that it honors the user time zone, if defined. It also defines `DateTime.yesterday` and `DateTime.tomorrow`, and the instance predicates `past?`, and `future?` relative to `DateTime.current`.

16.1.2 Other Extensions

16.1.2.1 `seconds_since_midnight`

The method `seconds_since_midnight` returns the number of seconds since midnight:

```
now = DateTime.current     # => Mon, 07 Jun 2010 20:26:36 +0000
now.seconds_since_midnight # => 73596
```

16.1.2.2 `utc`

The method `utc` gives you the same datetime in the receiver expressed in UTC.

```
now = DateTime.current # => Mon, 07 Jun 2010 19:27:52 -0400
```
