```
Rails.configuration.x.payment_processing.retries  # => 3
Rails.configuration.x.super_debugger              # => true
Rails.configuration.x.super_debugger.not_set      # => nil
```

9 Search Engines Indexing

Sometimes, you may want to prevent some pages of your application to be visible on search sites like Google, Bing, Yahoo or Duck Duck Go. The robots that index these sites will first analyse the `http://your-site.com/robots.txt` file to know which pages it is allowed to index.
Rails creates this file for you inside the `/public` folder. By default, it allows search engines to index all pages of your application. If you want to block indexing on all pages of you application, use this:

```
User-agent: *
Disallow: /
```

To block just specific pages, it's necessary to use a more complex syntax. Learn it on the official documentation.
