```
>> @employee = Employee.last
=> #<Employee id: 1, company_id: 1, created_at: "2013-11-25 17:04:22",
updated_at: "2013-11-25 17:05:05">

# triggers @employee.company.touch
>> @employee.touch
Employee/Company was touched
An Employee was touched
=> true
```

4 Running Callbacks

The following methods trigger callbacks:

- `create`
- `create!`
- `decrement!`
- `destroy`
- `destroy!`
- `destroy_all`
- `increment!`
- `save`
- `save!`
- `save(validate: false)`
- `toggle!`
- `update_attribute`
- `update`
- `update!`
- `valid?`

Additionally, the `after_find` callback is triggered by the following finder methods:

- `all`
- `first`
- `find`
- `find_by`
- `find_by_*`
- `find_by_*!`
- `find_by_sql`
- `last`

The `after_initialize` callback is triggered every time a new object of the class is initialized.

The `find_by_*` and `find_by_*!` methods are dynamic finders generated automatically for every attribute. Learn more about them at the Dynamic finders section

5 Skipping Callbacks

Just as with validations, it is also possible to skip callbacks by using the following methods:

- `decrement`
- `decrement_counter`
- `delete`
- `delete_all`
- `increment`
