creating test data with fixtures, 101, 103–108
criteria for test data, 101
Cucumber step definitions with data tables, 178
data structures, matching, 53
data tables, 178
global data and test independence, 75
loading from fixtures before tests, 245
managing dates and times, 123–128
random, 73
sort testing, 93
static, 107
stubbing with VCR, 289–293, 296–301
Database Cleaner, 121, 172, 335, 337
database.yml file, 172
database_cleaner gem, 122
databases, *see also* data; SQLite
access control, 272–274
bypassing Rails, 335, 337
creating, 12
delaying connecting to in TDD process, 25
factories, 109–123
fixtures, 103–108
forcing object creation with let!, 275
foreign key constraints, 354
legacy, 353
migrations, 12
performance, 76, 343
resetting in Minitest, 245
resource generator, 46
saving relationships to, 271
simulating failure with mocks, 138–141
testing ActiveRecord finders, 91–94
user authentication and authorization, 261–264
Date class (Ruby), 127
dates
calculating for Gatherer app, 30–40
dynamic dates, 124
helpers, 35
managing, 123–128
optional argument injection, 124
problems with, 34
relative dates, 35, 124
repeatability problems, 73
stubbing, 74, 125–126
DateTime class (Ruby), 127
db:migrate, 12
db:test:prepare, 245
debugging, 303–317
with bisecting, 309–311
clarity of tests, 72
common Rails gotchas, 317
Cucumber step definitions, 179
legacy code, 359
messages as program traces, 307
principles, 303
with print statements, 304–309, 319
with Pry, 311–317
running one test at a time, 307
running smaller groups of tests, 319
symbolic debuggers, 311
default_cassette_options, 300
defaults, 259
define, 97, 110
delaying tests, 214
delegation, 342
delete, 224
delete_all, 337
deleting
Minitest ActiveRecord classes, 337
simulating HTTP requests in request tests, 224
tests, 69
dependencies
bypassing Rails for speed, 338–341
dependency injection, 140
legacy code testing, 351–356
managing JavaScript, 186, 193
package.json file, 187, 193
performance, 72, 76, 338–341, 343, 352–356
removing, 338–341, 352–356
stealth, 37
dependency injection, 140
describe
about, 15
aggregating failures, 89
examples and example groups, 20, 94
making variables available with let, 26
pending tests, 45
setup in RSpec, 247
setups, separate, 31
single-assertion style, 56
unit testing JavaScript with Jasmine, 196, 199
VCR cassettes, 290
view testing, 235
described_class, 95
design and TDD
advantages, 3–5
app structure, 268
delaying connection to ActiveRecord, 25
disadvantages, 8
external services, 293
Gatherer app, 12, 17, 25, 49, 165, 268, 281
integration testing benefits, 171
legacy code, 349–352
mocks as indicator of code quality, 149
refactoring, 81–87
security, 281
workflow, 49
--dev, 193
devDependencies, 193
Devise
adding users and roles, 264–268
restricting access, 265, 268–280
user authentication and authorization, 261–264
devise method, 263
Devise::Test::IntegrationHelpers, 267
diff format, 98
diffable, 98
directories
Cucumber files, 172
factories, 109
fast tests, 341
fixtures, 104, 108
Rails apps, 12
