1.4.5 Fifth generation: Full autonomy, AI, and swarm technology
1.5 Summary
Review Questions
2. **First-generation Drones**
2.1 Introduction
2.1.1 Definition
2.1.2 Basic characteristics of first-generation drones
2.2 Early Concepts of Unmanned Aerial Vehicles (UAVs)
2.3 Historical Development
2.3.1 Early experiments and innovations
2.3.2 The role of balloons and kites in aerial surveillance
2.4 Technological Foundations
2.4.1 Principles and components of first-generation drones
2.5 Military Applications of First-generation Drones
2.5.1 Target practice and gunnery training
2.5.2 Reconnaissance and surveillance missions
2.5.3 Aerial bombing experiments
2.5.4 Experimental combat simulations
2.5.5 Propaganda and research tools
2.6 Developments and Pioneers of First-generation Drones
2.6.1 Contributions of early innovators in UAV technology
2.6.2 Key first-generation drone models
2.7 Limitations of First-generation Drones
2.8 Case Study: Early Drone Use in Military Exercises
2.9 Summary
Review Questions
3. **Second-generation Drones**
