- *Developer*: Aviation Industry Corporation of China (AVIC)
- *First flight*: 2015
- *Wingspan*: 14 m (46 ft)
- *Length*: 9 m (29.5 ft)
- *Endurance*: Up to 20 hours
- *Ceiling*: 16,400 ft (5000 m)
- *Range*: 4000 km
- *Speed*: 280 km/h (174 mph)
- *Propulsion*: Single piston engine (pusher configuration)
- *Payload*: 200 kg (combat + ISR sensors)
- *Armament*: BA-7 missiles, GB3 bombs, LS-6 guided bombs, Blue Arrow-7
- *Primary roles*: ISR, strike missions, counterterrorism, surveillance

Figure 4.9 illustrates the Wing Loong I, a medium-altitude long-endurance (MALE) UAV developed by AVIC China. The diagram highlights key structural features such as its electro-optical/infrared (EO/IR) turret, mid-mounted straight wings, underwing munitions, and rear-mounted pusher propeller. The tricycle landing gear design supports autonomous takeoff and landing, while the sleek airframe enhances aerodynamic efficiency. This figure demonstrates the Wing Loong I's multi-role design combining endurance, surveillance, and strike capability, symbolizing China's advancement in cost-effective, export-oriented unmanned aerial systems.
