33. Identify the key ethical, legal, and regulatory issues associated with UAV use in warfare.
34. Describe the communication vulnerabilities commonly faced by third-generation drones.
35. Summarize the operational achievements of the RQ-4 Global Hawk in global intelligence missions.
36. How did the MQ-9 Reaper’s dual capability for surveillance and combat redefine UAV warfare?
37. What were the primary lessons learned from the Dassault Neuron’s stealth and autonomous tests?
38. Explain the significance of the X-47B’s autonomous carrier take-off and landing operations.
39. Discuss how the Wing Loong I demonstrated China’s emergence as a global UAV exporter.
40. Conclude how third-generation UAVs established the foundation for the development of AI-driven, fully autonomous drones in the fourth generation.
