**Table 5.1** Developments and pioneering models of fourth-generat drones.

| Model/year | Developer/country | Key features and technologies | Primary role/application | Signific |
|---|---|---|---|---|
| **XQ-58A Valkyrie (2019)** | Kratos Defense/United States | AI-enabled "loyal wingman" UAV with stealth design and modular payloads. | Combat support, reconnaissance, EW. | Demons manned unmann teaming low-cos autonor strike compan |
| **Skyborg Program (2020)** | DARPA/United States | AI-based autonomy core for multiple UAV platforms. | Open-architecture autonomy and swarm coordination. | Founda for autonor control next-ge UAVs collabo swarms |
| **Boeing Airpower Teaming System (ATS) (2020)** | Boeing/Australia | 11.7 m UAV with modular payloads, long range, and AI | Loyal wingman, ISR, and strike operations. | Australi first indigen UAV; p in internat coopera |
