5.6.2.4 Boeing Airpower Teaming System (ATS) (2020)

The Boeing Airpower Teaming System (ATS), unveiled in 2020, is a groundbreaking autonomous, multi-role unmanned aircraft developed by Boeing Australia in partnership with the Royal Australian Air Force (RAAF). It represents both Australia's first indigenously developed combat drone and a major milestone in the global movement toward AI-enabled, manned– unmanned teaming (MUM-T). The system is designed to operate as a "loyal wingman," flying alongside manned aircraft to extend their
