Acknowledgment

The creation of *DRONES – Journey from First to Fifth Generation and Beyond* has been a profound and rewarding journey. This book is the culmination of insights, experiences, and the generous support of numerous individuals and institutions who have contributed in various ways to its development and we would not have been able to complete it without the guidance, cooperation and encouragement of many individuals.

First and foremost, we thank the Almighty for granting us this opportunity and for inspiring us to believe in passion, hard work, and the pursuit of our dreams. In the process of putting this book together it was realized how true this gift of writing is for anyone. This could never have been done without power provided by you and of course, the faith in You, the Almighty.

Our deepest gratitude goes to our families for their unending encouragement and understanding. Your patience during the long hours of writing and your unwavering belief in us provided the emotional support necessary to see this project through to completion. Your words of encouragement and your ability to remind me of the bigger picture have been invaluable, which also helped us to take yet another challenge, which decreases the amount of time we could spend with them. They were our inspiration and motivation and their constant encouragement and late-night brainstorming sessions were invaluable. The unwavering support and insightful feedback helped to shape the direction of this book and to say least, their belief in our vision made all the difference. We would like to thank our parents and grandparents for allowing us to follow our ambitions.
