3. Discuss how UAV innovation has influenced industrial transformation.
4. What societal challenges have UAVs helped to address in recent decades?
5. Explain the relationship between UAV adoption and digital modernization.
6. Describe the global growth trajectory of the UAV market.
7. What new employment opportunities have emerged due to UAV adoption?
8. Identify three sectors that have economically benefited from UAV integration.
9. How have UAVs contributed to reducing operational costs in industry?
10. Discuss investment trends shaping the future of UAV development.
11. What are autonomous combat drones, and how do they differ from remotely piloted systems?
12. Explain the tactical advantages drones provide in modern military operations.
13. How do drones reduce operational risks for armed forces?
14. Discuss an ethical concern associated with autonomous drone warfare.
15. What legal challenges arise when delegating lethal decisions to AI-driven UAVs?
16. Define precision farming and describe the role of UAVs in it.
17. How do drones assist in soil and irrigation monitoring?
18. Explain how UAV use supports sustainable food production.
19. Describe two benefits of using multispectral sensors in agriculture.
20. How do UAVs improve yield consistency and farm decision-making?
21. Explain how UAVs support wildlife monitoring and anti-poaching efforts.
22. Describe drone-based reforestation and seed-dispersion technologies.
