Within the **Alignment** group, you can choose to horizontally or vertically align text within a cell. The horizontal alignment option enables you to shift the content from the left edge of the cell to the center or right edge.

Select the cells you want to change the alignment, go to the **Alignment** group under the **Home** tab, then select any of the Horizontal alignments commands.

So on the **Assignment 1** workbook you must have created, select all the **Months** and their values and have them **Center Aligned**.
