ADDING FILL AND TEXT COLOR

Excel applies a fill color to a cell or a group of cells within a worksheet, which acts as a background color. Using fill colors in a worksheet helps to make data more organized and easier to read. It also adds visual interest to the worksheet.

Select the cells or range of cells you want to add a fill color.

On the **Home** tab, locate the **Fill Color** command button under the **Font** group.

Click the **drop-down** arrow next to the Fill Color command to display the Fill Color palette.
