1. You can preview the style on the selected cells in Excel to see what it will look like when applied. Once you have found a style you like, click on it to apply the formatting to your worksheet.

A wide variety of cell styles are available in Excel, including styles for headings, values, and totals.

The Cell Styles gallery also allows you to create your **custom cell styles** by selecting the cells you want to include in the style and then clicking the **New Cell Style** button to open the Cell Styles gallery.
