=**A2**+**B2**

This means **A2** and **B2** are the **operands** in the formula.

This formula uses the **addition operator (+)** with the values in cells **A2** and **B2**.

When you enter the formula into any cell on the worksheet, it will automatically add the contents of cells **A2** and **B2**.

When done entering a formula, you press the **Enter** key to complete the process. This will automatically show the result in the destination cell.

If you go back and click on the cell where you entered the Excel formula, you will see the formula displayed on the formula bar.
