

To select a range of cells, you click, hold, and drag the mouse to the point where you want to stop.

If we are to select the amount spent on phone calls from January to April using the illustration below, that will be cell **B5** to Cell **E5.**

You have to go to cell **B5,** click, hold, and drag the mouse to cell **E5.**

Excel will recognize the selected cells as range **C5:E5.**
