1. Click on the **Product Ordered** sheet and select cell **A2** (under **Product List**) to enter the reference.

1. Enter the formula you want to use until you reach the point where you want to reference the other worksheet. However, since we are only interested in capturing the text values (Product name in the **Station 1** sheet), the formula will start with an **equal sign** =

1. With your cursor still in cell **A2** (in the **Product Ordered** sheet), after typing the **equal sign** =, click on the **Station 1** sheet and select cell **B2**
