(Under the **Product Name**). This is the format you use to refer to another sheet.

2. You will see the cell reference formula automatically created by Excel on the formula bar in the **Station 1** sheet.

As you can see in the illustration above, on the formula bar, you have;

='Station 1'!B2

This means the formula refers to cell **B2** in the Worksheet called **Station 1.**

1. After confirming the reference, Press the **Enter** key, and Excel will return you to the destination (the **Product Ordered** sheet).
2. When you click cell **A2** on the **Product Ordered** sheet, the formula will appear on the formula bar.
