AUTOMATICALLY REFERENCING ANOTHER OPENED WORKBOOK

As previously discussed, using the automatic method to reference a Workbook points excel directly in the direction it will take to create a reference without you entering it manually.

Here is an example of how to retrieve the **data** in cells **A2**:**A4** of a Worksheet named '**Stocking Data**' in a Workbook called '**Assignment File**' in the current Workbook called '**Cummulative**':

Both Workbooks are running on the system.
