

	A	B	C	D	E	F	G	H	I
1		Temperature in Degree							
2	Month	Reading 1	Reading 2	Reading 3	Reading 4	Reading 5	Reading 6	Reading 7	Average
3	Jan	20	23	23	22	22	23	23	22.28571
4	Feb	21	22	23	23	23	23	22	
5	Mar	20	22	22	23	22	22	23	

The AVERAGE function ignores empty or text-filled cells, so don't use it on those. Cells with FALSE or TRUE logical values will also be ignored.

You can also use the AVERAGE function to determine the average of the results of other Excel functions besides the Average of a range of cells.

A simple example below shows a range of cells **B3** to **B6** added up using the **SUM** function and then calculating the **Average** using the **AVERAGE** function.

	A	B	C	D	E	F	G	H	I
1		Temperature in Degree							
2	Month	Reading 1	Reading 2	Reading 3	Reading 4	Reading 5	Reading 6	Reading 7	
3	Jan	20	23	23	22	22	23	23	
4	Feb	21	22	23	23	23	23	22	
5	Mar	20	22	22	23	22	22	23	
6	Apr	21	23	23	22	23	23	22	Average
7		=SUM(B3:B6)							
8		SUM(**number1**, [number2], ...)							

The formula in cell **B7** is copied and pasted into cell **C7** to **H7.**
